

RELEVANT FACT / HECHO RELEVANTE

A EGRAINS S.A. DE C.V. (E-GRAINS), a leading company in digital assets, hereby informs investors about a significant disruption in operations related to our soy-backed token, \$ESOY. During the launch of \$ESOY, we received high demand from new institutional investors and market makers.

This type of client requires a registration process, as well as High Frequency Trading tool integration testing and validation.

In order to serve all market participants, we decided to postpone the launch of the secondary market until May 15, 2024. We believe that this period will be sufficient for all participants to be duly registered and have their technologies integrated, tested and approved on eNor Securities (PSAD-0014).

This measure aims to ensure efficiency and security in the functioning of the market, benefiting everyone involved.

We remind you that precision and transparency are fundamental to communicating relevant information to shareholders and the market in general. If you have any additional questions, we are available for clarification.

San Salvador, March 18th, 2024

Bruno Leon Winik
Managing Director
